PREFACE: CLOSING THE GAP BETWEEN EXPECTATIONS AND REALITY

xiii

1	INTRODUCTION	1
	Technical versus Fundamental	1
	Professional and Amateur	2
	Random Walk	3
	Background Material	4
	Research Skills	5
	Objectives of This Book	6
	Profile of a Trading System	6
	A Word on Notation Used in This Book	8
2	BASIC CONCEPTS	9
	About Data and Averaging	9
	On the Average	11
	Distribution	13
	Dispersion and Skewness	16
	Standardizing Returns and Risk	20
	The Index	22
	Probability	23
	Supply and Demand	29
3	REGRESSION ANALYSIS	30
	Characteristics of the Price Data	30
	Linear Regression	38
	Method of Least Squares	39
	Linear Correlation	42
	Nonlinear Approximations for Two Variables	45
	SecondOrder Least Squares	46
	Evaluation of 2Variable Techniques	48
	Multivariate Approximations	51
	ARIMA	55
	Linear Regression Model	60
4	TREND CALCULATIONS	62
	Forecasting and Following	62
	LeastSquares Model	63
	The Moving Average	65
	Geometric Moving Averages	68
	DropOff Effect	71
		viii
	Exponential Smoothing	75
	Relating Exponential Smoothing and Standard Moving	
	Averages	81
5	TREND SYSTEMS	89
	Basic Buy and Sell Signals	89

	Bands and Channels	90	
	Applications of Single Trends	95	
	Comparison of Major Trend Systems	100	
	Techniques Using Two Trendlines	116	
	Comprehensive Studies	120	
	Selecting the Right Moving Average	120	
	Moving Average Sequences: Signal Progression	122	
	Living with a TrendFollowing Philosophy	123	
6	MOMENTUM AND OSCILLATORS	126	
	Momentum	126	
	Oscillators	133	
	DoubleSmoothed Momentum	144	
	Adding Volume to Momentum	14	
	Velocity and Acceleration	149	
	Other RateofChange Indicators	152	
	Momentum Divergence	154	
	Momentum Smoothing	15	
	Some Final Comments on Momentum	158	
7	SEASONALITY	160	
	A Consistent Factor	160	
	The Seasonal Pattern	161	
	Popular Methods for Calculating Seasonality	161	
	Weather Sensitivity	14	
	Seasonal Filters	16	
	Common Sense and Seasonality	188	
8	CYCLE ANALYSIS	189	
	Cycle Basics	189	
	Uncovering the Cycle	193	
	Maximum Entropy	208	
	Cycle Channel Index	209	
	Phasing	210	
9	CHARTING	213	
	Finding Consistent Patterns	214	
	Interpreting the Bar Chart	215	
	Chart Formations	217	
	Basic Trading Rules	218	
	Tops and Bottoms	221	
	Gaps	225	
	Key Reversal Days	226	
	Episodic Patterns	227	
	Price Objectives for Bar Charting	228	
		ix	
	Candlestick Charts	232	
	Using the Bar Chart	234	
10	VOLUME, OPEN INTEREST, AND BREADTH	237	
	Contract Volume versus Total Volume	237	
	Variations from the Normal Patterns	238	
	Standard Interpretation	239	

	Volume Indicators	240	
	Interpreting Volume Systematically	249	
	An Integrated Probability Model	250	
	Intraday Volume Patterns	251	
	Filtering Low Volume	253	
	Market Facilitation Index	254	
	Sources of Information	255	
11	POINTANDFIGURE CHARTING	256	
	Plotting Prices Using the PointandFigure Method	257	
	Chart Formations	259	
	PointandFigure Box Size	261	
	The Problem of Risk	263	
	Trading Techniques	264	
	Price Objectives	268	
	A Study in PointandFigure Optimization	272	
12	CHARTING SYSTEMS	281	
	Swing Trading	281	
	William Dunnigan and the Thrust Method	290	
	Nofri's CongestionPhase System	292	
	Outside Days with an Outside Close	293	
	Action and Reaction	294	
	Channel Breakout	298	
	Moving Channels	300	
	Combining Techniques	300	
	Complex Patterns	302	
13	SPREADS AND ARBITRAGE	305	
	Spread and Arbitrage Relationships	307	
	Arbitrage	307	
	Changing Spread Relationships	316	
	Carrying Charges	320	
	Technical Analysis of Spreads	322	
	Volatility and Spread Ratios	329	
	Leverage in Spreads	332	
14	BEHAVIORAL TECHNIQUES	334	
	Measuring the News	334	
	Event Trading	338	
	Commitment of Traders Report	344	
	Opinion and Contrary Opinion	346	
	Fibonacci and Human Behavior	350	
	Elliott's Wave Principle	353	
	X		
	Constructions Using the Fibonacci Ratio	361	
	Fischer's Golden Section Compass System	363	
	W.D. GannTime and Space	366	
	Financial Astrology	371	
15	PATTERN RECOGNITION	382	
	Projecting Daily Highs and Lows	383	

	Time of Day	384	
	Opening Gaps and Intraday Patterns	394	
	Three Studies in Market Movement	Weekday, Weekend, and Reversal	
	Patterns	400	
	ComputerBased Pattern Recognition	416	
	Artificial Intelligence Methods	417	
16	DAY TRADING	419	
	Impact of Transaction Costs	419	
	Applicability of Trading Techniques	423	
	Market Patterns	428	
17	ADAPTIVE TECHNIQUES	436	
	Adaptive Trend Calculations	436	
	Adaptive Momentum Calculations	444	
	An Adaptive Process	446	
	Considering Adaptive Methods	447	
18	PRICE DISTRIBUTION SYSTEMS	449	
	Using the Standard Deviation	449	
	Use of Price Distributions and Patterns to Anticipate Moves	451	
	Distribution of Prices	453	
	Steidlmayer's Market Profile	458	
19	MULTIPLE TIME FRAMES	465	
	Tuning Two Time Frames to Work Together	465	
	Elder's TripleScreen Trading System	466	
	Robert Krauszs Multiple Time Frames	468	
	A Comment on Multiple Time Frames	470	
20	ADVANCED TECHNIQUES	471	
	Measuring Volatility	471	
	Trade Selection	482	
	PriceVolume Distribution	483	
	Trends and Noise	484	
	Expert Systems	485	
	Fuzzy Logic	488	
	Fractals and Chaos	490	
	Neural Networks	492	
	Genetic Algorithms	498	
	Considering Genetic Algorithms, Neural Networks, and Feedback	502	
21	TESTING	503	
	Expectations	504	
	Identifying the Parameters	505	
		xi	
	Selecting the Test Data	506	
	Searchbing for the Optimal Result	508	
	Visualizing and Interpreting the Results	510	
	StepForward Testing and OutofSample Data	517	
	Changing Rules	519	
	Arriving at Valid Test Results	520	
	PointandFigure Testing	525	

	Comparing the Results of Two Systems	527
	Profiting from the Worst Results	530
	Retesting Procedure	531
	Comprehensive Studies	533
	Price Shocks	546
	Anatomy of an Optimization	547
	Data Mining and Overoptimization	548
	Summary	554
22	PRACTICAL CONSIDERATIONS	555
	Use and Abuse of the Computer	555
	Price Shocks	562
	Gambling TechniqueThe Theory of Runs	565
	Selective Trading	572
	System TradeOffs	574
	Trading LimitsA Dampening Effect	579
	Going to Extremes	582
	Similarity of Systems	583
23	RISK CONTROL	587
	Risk Aversion	587
	Liquidity	589
	Capital	590
	MeasuringRisk	591
	Leverage	596
	Diversification	598
	Individual Trade Risk	603
	Ranking of Markets for Selection	609
	Probability of Success and Ruin	614
	Compounding a Position	617
	Equity Cycles	619
	Investing and Reinvesting Optimal f	623
	Comparing Expected and Actual Results	626
	APPENDIX 1 STATISTICAL TABLES	631
	Probability Distribution Tables	631
	Table of Uniform Random Numbers	633
	APPENDIX 2 METHOD OF LEAST SQUARES	634
	Operating Instructions	634
	Computer Programs	634
	LeastSquares Solution for CornSoybeans	640
	LeastSquares Solution for Soybeans Only	645
	A	
	APPENDIX 3 MATRIX SOLUTIONS TO LINEAR EQUATIONS AND MARKOV CHAINS	651
	Direct Solution and Convergence Method	651
	General Matrix Form	651
	Direct Solution	651
	Convergence Method	657
	APPENDIX 4 TRIGONOMETRIC REGRESSION FOR FINDING CYCLES	659

SingleFrequency Trigonometric Regression	659
TwoFrequency Trigonometric Regression	663
APPENDIX 5 FOURIER TRANSFORMATION	669
Fast Fourier Transform Program	669
APPENDIX 6 CONSTRUCTION OF A PENTAGON	673
Construction of a Pentagon from One Fixed Diagonal	673
Construction of a Pentagon from One Side	674
BIBLIOGRAPHY	676
INDEX	687
